PROFESSIONAL SUMMARY

Cybersecurity senior at Old Dominion University (3.94 GPA, graduating May 2027) focused on digital forensics and incident response. Funded researcher studying how human oversight of AI-assisted workflows breaks down as automation grows. Built a VR cyber awareness game that won the GenCyber Scholar Award and an agentic-AI housing tool for Teamship Hampton Roads. Hands-on with Linux, Wireshark, firewall configuration, and vulnerability testing. Seeking an entry-level federal or government-contract cybersecurity role.

EDUCATION

Old Dominion University — Norfolk, VA — School of Cybersecurity Summer 2026 – Present

Bachelor of Science, Cybersecurity | Minor: Mandarin Chinese | GPA: 3.94/4.00 | Senior standing | Expected Graduation: May 2027

- Relevant coursework: Digital Forensics; Generative AI in Cybersecurity; Cybersecurity & Social Science; Cybersecurity, Technology & Society.

Grossmont College — San Diego, CA (Cross-Town AFROTC Program with SDSU) Completed June 2026

Associate of Science, Computer Science, Natural Science, and Mathematics | GPA: 3.48/4.00

- STEM Promise Scholar; Horatio Alger Scholarship recipient.
- Relevant coursework: Python, Linux administration, networking, cybersecurity fundamentals, data structures.

Ocean Lakes High School — Virginia Beach, VA 2023

High School Diploma, Summa Cum Laude — completed one year early.

CYBERSECURITY & TECHNICAL EXPERIENCE

COVA CCI Undergraduate Cybersecurity Research Program — Old Dominion University Sep 2026 – Present

- Selected for the Coastal Virginia Center for Cyber Innovation's competitive, funded Undergraduate Cybersecurity Research Program; conducting independent, mentor-guided research (mentor: Prof. Teresa Duvall) on "oversight drift," how human oversight of AI-assisted workflows weakens as automated decision chains grow longer, and on who feels that drift first, including generational disparities in access to cybersecurity exposure.
- Building a two-part prototype: an Oversight Drift calculator that scores a workflow from 0 to 100, and an automated loop run with and without human checkpoints to measure drift in action. Culminating in a research paper and presentation at the December 2026 Student Research Showcase.

CyberAI Workforce Accelerator Webinar Series (in progress) — GMU and JMU Nov 2026 – Feb 2027

- Selected for a four-part series, funded by the Commonwealth Cyber Initiative, on healthcare cybersecurity, critical infrastructure protection, threat modeling, and AI-supported cybersecurity analysis. Top participants are chosen for a hands-on phase with mentored activities and a healthcare CyberAI hackathon.

Lead Web Developer & UX Designer, Teamship Hampton Roads Jul – Aug 2026

- Independently designed and built the Newport News Housing Hub, an interactive web prototype addressing local housing accessibility, using Replit and agentic AI tools, including Buy/Rent/Build pathways, an AI housing assistant, an affordability calculator, a guided Housing Journey flow, neighborhood comparison tools, and homebuying simulations.
- Tracked the real cost of building an agentic-AI-driven website from the ground up: $260, excluding extensive experimentation and prompt-engineering time.
- Directed a four-person team by assigning individual deliverables based on each member's strengths, keeping the project on track toward a cohesive final product.
- Conducted stakeholder interviews and translated findings into product features, then wrote the full script and designed all slides for the final stakeholder presentation, and fielded live questions on functionality, usability, and implementation.

AWS ReachBack Cohort Participant — Amazon Web Services Arlington, VA — Aug 2026

- Selected for Amazon's AWS ReachBack talent development cohort; completed a hands-on lab building with Kiro, AWS's agentic AI coding IDE, alongside AWS engineers and recruiters.
- Engaged with AWS professionals through a career panel, technical sessions, and a University Talent Pathways (UTP) application overview.

GenCyber Scholar — Old Dominion University GenCyber Camp 2022

- Independently designed and built a virtual reality cyber awareness learning game in under two days using Oculus and Unreal Engine 5; awarded the Scholar Award, the camp's highest honor, for the project.

LEADERSHIP & COMMUNITY

Cadet, Air Force ROTC Detachment 075 — San Diego State University Aug 2024 – Sep 2025

AS-250/AS-500 Cadet, Golf Flight (formerly Delta Flight)

- Served as Lead Officer for Morale, Welfare, and Recreation (MWR), managing event logistics and budget for a 150+ member cadet unit, and drafted and briefed Operations Orders (OPORDs) and event proposals to cadre officers. Voluntarily disenrolled in September 2025, without prejudice, to pursue civilian cybersecurity work.

President, CyberPatriot Team — Air Force Association Program, Virginia Beach, VA Sep 2021 – Jun 2023

- Led a five-student team in a national cybersecurity competition, securing Windows and Linux systems, configuring firewalls, and running vulnerability analysis and incident response under live scoring.
- Earned the Top Scholar Award for technical and leadership performance.

Worthy Advisor, International Order of the Rainbow for Girls — Virginia Beach, VA Jan 2017 – Jun 2023

- Organized 400+ hours of community service and fundraising while mentoring youth members in leadership and teamwork; sang in the Grand Choir and won a ritual competition.

Member, Women in CyberSecurity (WiCyS) — online club Aug 2026 – Present

BUSINESS & CREATIVE VENTURES

Founder & Media Lead, YAS Entertainment — San Diego, CA Jan 2017 – Present

- Build and maintain a multi-platform web presence (WordPress, Canva, Lightroom) for an independent multimedia company, and design brand assets and digital marketing campaigns for weddings, political events, and community projects.

Founder, All Roads Lead Back to Code LLC Feb 2023 – Present

- Independent technology and web development business.

TECHNICAL SKILLS

Web & Product: Replit, interactive prototyping, responsive design, UI/UX fundamentals, information architecture
Agentic AI: Kiro, Replit, prompt engineering, AI cost and oversight analysis
Programming & Systems: Python, Java, CSS, PyCharm, Linux, Virtual Machines (VirtualBox/VMware), Unreal Engine 5
Cybersecurity & Networking: Wireshark, Cisco Packet Tracer, network security, cryptography fundamentals, firewall configuration, vulnerability testing
Design: Adobe Photoshop, Lightroom, Canva
Languages: English (fluent), Mandarin Chinese (intermediate proficiency), Korean (Virtual NSLI-Y Program, 2022)

HONORS & CERTIFICATIONS

CompTIA Security+ (in progress) • Microsoft Cybersecurity Grant Recipient (2023) • SANS Foundation Cybersecurity Certification (2023) • NCWIT Award for Computing (2023) • FBI Future Agents in Training — completed FBI PFT and coursework (2022) • Virtual NSLI-Y Korean Language Scholarship, U.S. Dept. of State (Fall 2022)
